

Evaluation Preparation

Setup: This task is tested over the course of an overnight field exercise. The exercise should include at least two miles of dismounted movement. You should observe the students over the course of the exercise and evaluate them at the conclusion of the exercise. Anything not directly observed (such as the use of a cathole) should be evaluated through oral questioning.

Brief Student: Inform the individuals to be tested that they will be evaluated over the course of the next 24 hours on their ability to conduct field sanitation and hygiene.
